

FAQ – Ultra-Spray Automated Spray System

Q How does the Ultra-Spray work?

A Ultra-Spray is a battery operated large capacity pressurized automated spray system that can be used on both horizontal and vertical surfaces.

Q What is capacity and how long does it run?

A It houses either a 5 gallon pail, or two 2.5 gallon containers with an EZ change out feature. Run time is 2-3 hours per charge.

Q Is the Ultra-Spray adjustable?

A Yes, Both the floor spray nozzle and the spray wand are adjustable to your particular application. The spray width is 18 – 36 inches for horizontal surfaces; carpets or floors.

Q What kind of chemicals can be used with the Ultra-Spray?

A The applications are virtually unlimited. Some examples are: application of disinfectants to combat swine flu and MRSA pandemic, applying encapsulation agents, applying bio-enzyme agents, applying deodorizers, carpet spotting agents, bonnet solutions, traffic pretreatments, liquid ice melt and weed killer... Any water chemical can be used with the Ultra-Spray to both vertical and horizontal surfaces.

Q Where is the Ultra-Spray manufactured?

A The Ultra-Spray automated spray system is made in the U.S.A.

Q How much area can be sprayed in an hour?

A On a horizontal surface (floor) you can apply chemicals at about 20,000 sq. ft. per hour. We are about **5 times faster** than the suit case type sprayers that are on the market.

Q Does the battery/charging system require maintenance?

A No, The battery/charging system is the same design as the proven Ultra-Trak application system we produce. It is a sealed maintenance free battery that will give you years of trouble free service.

Q Is there a wall wash attachment available?

A Yes. The wall washing tool attaches to the coiled hose using the quick disconnect. The wall washing tool feeds clean solution to the wall for quick and easy cleaning of walls in hospital operating rooms and patient rooms, casinos, and schools – any facility where walls need washing or disinfection. The wall washing tool is also telescopic and extends to 10 feet.

Q How much faster is the wall washing procedure?

A Our studies conclude that this procedure is **5 times faster** than conventional methods. Most walls can be cleaned from the floor using our telescopic extension tool; which eliminates dangerous ladders and climbing to reach high areas. Watch the procedure on our website. The safety aspects are quite important.
