

Fas-Trak Industries is proud to introduce another patented breakthrough innovation performance solution in floor care application.

The 2-in-1 Sting-Ray is designed specifically for applying floor finishes to small and medium size areas in facilities by the most efficient method available today! Fas-Trak Industries is the industry leader in application technology. Easily sets up in a minute and

applies finish directly from our custom designed reusable 5 gallon pail or you can use certain B.I.Bs like shown below! Weighs only 12lbs. Transport is simple and requires little training.

The Sting-Ray takes the sting out of your challenges to achieve professional results and saves you money and precious natural resources.

FAQ's

Q. How does the Sting-Ray work?
A. Fill our specially designed 5 gallon pail with product of your choice. Turn the spigot on partially and walk at a controlled pace. Go back to your starting point and spread the finish using the Stinger applicator and continue.

Q. How much of a "bead" do I apply?
A. Based on extensive testing a 4" wide bead will yield 2000 sq/ft per gallon. If you need less adjust your spigot accordingly. There is a short learning curve similar to any basic cleaning technique.

Q. Which floor finishes can be used?
A. Any brand and type can be used.

Q. Why is it better than a backpack?
A. Less fatigue, 30% faster and less refills, easier setup and no clogged hoses!

STING-RAY

2-in-1 Direct Dispense Applicator

SPECS AND FEATURES
