

CONSIDER THE BENEFITS OF FAS-TRAK INNOVATIVE SOLUTIONS!

- Quick & easy clean up
- Environmentally responsible
- Pressurized application
- Precision adjustments
- Elimination of cross contamination
- Reduction of chemical usage & waste
- Rugged, industrial construction
- Ergonomic, portable & lightweight designs

Money saving

ULTRA-TRAK

Chemical Applicator - Concrete Edition

Tired of slow, inconsistent methods of applying chemicals? Fas-Trak Industries is proud to announce ULTRA-TRAK, the revolutionary chemical application system! The ULTRA-TRAK is the most productive, pressurized chemical application system on the market today.

We had the user in mind when state-of-the-art technology and common-sense engineering were combined to produce the most time efficient chemical applicator ever. This superior labor and chemical saving applicator is designed for all areas where professional quality is key to minimize costs and improve the desired polishing results.

FAS-TRAK APPLICATIONS

Fas-Trak Industries is a proactive innovative manufacturer of performance related application technology for the maintenance & janitorial industry. Our passion is to create innovative performance solutions by redefining and expanding surface application processes.

Our proprietary patented technology is industry proven and addresses the main challenges related to floor care issues today namely – labor savings as well providing superior results. Our product solutions can be used on concrete, tile, terrazzo, and other floor surfaces.

Our customer base is a who's who which include Venture Speciality, US Postal Services, Southeast Services and Concrete Visions to name a few.

"The Ultra-Trak application systems we bought have been used by our staff and we have reduced our hardener densifier usage by 35%. Our labor reduction is around 60% but the uniformity of application has given us a superior polished concrete result. Ultra-Trak is a contributing factor in obtaining substantial growth in an ever competitive field. "

Roy Bowman, Owner
Floor Visions Oklahoma City, OK

FAQ's

Q. Why is a pressurized application system better than spray systems?

A. Our proprietary design allows for consistent, uniform and accurate delivery of chemicals which improves desired cleaning results. There is no overspray or misting of chemicals to unwanted areas.

Q. Why should I use this system verses running the densifier through my automatic scrubber?

A. Automatic scrubbers waste too much product on the concrete. Plus the weight of the machine leaves wheel trails which makes your work look sloppy and inconsistent. Your chemical consumption will lower dramatically and the polished results will improve.

SPECS AND FEATURES

- Apply water or solvent-based concrete coatings at 20,000 sq/ft hour
- Apply densifiers, hardeners, finish coats and sealers at 25,000 sq/ft hour. (10x faster than conventional application methods)
- Environmentally responsible: Cut product waste by up to 20%
- Fully Automatic & Pressurized: Cleans in one minute
- Fully adjustable application feature
- Built-in charger with a battery run time of 5 - 7 hours
- 2 Head sizes available: 28" or 36"
- Portable and lightweight
- Industrial grade quality and performance

IDEAL APPLICATIONS

- Warehousing
- Contractor Services
- Airports
- Convention Centers
- Auditoriums
- Shopping Centers

PARTS & SIZES

Warranty: 1 year parts
10 years on body
